# Acknowledgements

We would like to take this opportunity to thank **Prof. Prashant Jadav** for allowing us to carry on our project under him. We would also like to thank him for his endless support, guidance, ideas and motivations. We would also like to thank him for sharing his endless experience in the field of web development with us.

We are also sincerely grateful to professor **Prof. Pinkal Chauhan** for continuously supporting us in every possible way, from initial advice to encouragement till this date. Experience shared by her, her suggestions and ideas have helped us a lot throughout the project.

We would also like to thank our friends (classmates as Dharmsinh Desai university) for their constant help and assistance.

# Abstract

*“Education is the best friend. An educated person is respected everywhere. Education beats the beauty and the youth.” --Chanakya*

Knowledge plays one of the most important roles in a person's life. But with time the cost of education has also increased. So, through the medium of ShareEdu we are trying to provide education free of cost for those who are eager to learn and want to develop skill.

Shareedu is an online learning platform built using latest web technology like **Angular, Node, Typescript**. ShareEdu uses **mongo dB** which help us to store data and achieve scalability for the application.

Shareedu is platform where the users can access courses, videos, notes and textbooks (provided by various experienced professor from different institutions present all over the world) without any cost from anywhere in the world.

# *INTRODUCTION*

---

Shareedu is an online e-learning site that provides free of cost courses and materials to every user. These courses are designed by various experienced professor such that every course helps user to gain skill which would benefit them in various ways.

Shareedu uses various web technology and was developed using various tools as listed below.

## Technologies

---

1. Node.js
2. Mongo dB
3. Angular
4. jQuery
5. JavaScript
6. HTML
7. CSS

## Tools

---

1. Visual Code
2. Mongo Db Compass, Shell
3. Postman

# SOFTWARE REQUIREMENT SPECIFICATION

---

## *Types of Users:*

1. Admin
2. Student
3. Teachers

## *Functional Requirement*

### 1. General Requirements:

#### *R.1.1: Login:*

**Description:** User Login with given id and password

**Input:** User Id and Password

**Output:** Show error if any or allows user to continue further

#### *R.1.2: Signup:*

**Description:** User enters name, emailid, password and get registered.

**Input:** name, email id, password.

**Output:** Display message

#### *R.1.3: About Us:*

**Description:** Information about developer, contact information etc.

**Input:** User Click

**Output:** Displays Information

#### *R.1.4: Pricing:*

**Description:** Displays selected course pricing.

**Input:** User selects course.

**Output:** Course details and price is shown.

R.1.5: FAQ:

**Description:** Displays frequently asked question and answer

**Input:** User click

**Output:** FAQ is displayed

R.1.6: Discussion Forum:

**Description:** User can ask question or enter answer to a question.

**Input:** Question/Answer

**Output:** Display Updated Page

## 2. Admin

### *R.2.1: Manage Students*

*R.2.1.1: Add Student*

**Description:** Admin can add Student

**Input:** student email id, password

**Output:** Message is shown.

*R.2.1.2: Remove Student*

**Description:** Admin can remove Student

**Input:** student email id

**Output:** Message is shown.

### *R.2.2: Manage Teachers*

*R.2.2.1: Add Teacher*

**Description:** Admin can add teacher

**Input:** student email id, password

**Output:** Message is shown.

*R.2.2.2: Remove Teacher*

**Description:** Admin can remove teacher

**Input:** user click on delete button

**Output:** Message is shown.

### ***R.2.3: Manage Courses***

#### ***R.2.3.1: Add Courses***

**Description:** Admin can add courses

**Input:** student email id, password

**Output:** Message is shown.

#### ***R.2.3.2: Remove Courses***

**Description:** Admin can remove courses

**Input:** user click on delete button

**Output:** Message is shown.

#### ***R.2.3.3: Update courses price***

**Description:** Admin can add Student

**Input:** Course id and updated price

**Output:** Message is shown.

#### ***R.2.3.4: Add videos related to course***

**Description:** Admin can add videos

**Input:** name, description, course and video file to be uploaded

**Output:** Message is shown.

#### ***R.2.3.5: Remove videos***

**Description:** Admin can remove videos

**Input:** user click on video to be deleted

**Output:** Message is shown.

#### ***R.2.3.6: Add Textbooks***

**Description:** Admin can add textbooks

**Input:** name, description, course and pdf to be uploaded

**Output:** Message is shown.

#### *R.2.3.7: Remove Textbooks*

**Description:** Admin can remove textbooks

**Input:** user click on textbooks to be deleted

**Output:** Message is shown.

#### *R.2.4: Send mails*

**Description:** Admin can send mails to teacher and student

**Input:** subject, content, and email id

**Output:** Message is shown.

### **3. Student**

#### *R.3.1: Courses*

##### *R.3.1.1: View courses*

**Description:** Student can see a list of courses available

**Input:**

**Output:** List of courses

##### *R.3.1.2: search courses*

**Description:** Student can search particular course

**Input:** course name

**Output:** Respective course is displayed

#### *R.3.2: Subscription*

##### *R.3.2.1: Subscribe*

**Description:** Student can subscribe to a particular course

**Input:** student click on subscribe button

**Output:** Success Message

*R.3.2.2: Unsubscribe*

**Description:** Student can unsubscribe from a particular course

**Input:** student click on subscribe button

**Output:** Success Message

*R.3.3: Manage Account Details*

*R.3.3.1: Edit*

**Description:** Student can edit his/her details

**Input:** student enter updated details

**Output:** Success Message

*R.3.4: Manage Notes*

*R.3.4.1: Create Notes*

**Description:** Student can create his/her notes online

**Input:** click on create button

**Output:** Notes is created

*R.3.4.2: Delete Notes*

**Description:** Student can Delete his/her notes

**Input:** name of note

**Output:** Success Message

*R.3.4.3: Edit Notes*

**Description:** Student can edit his/her notes

**Input:** name of note

**Output:** Success Message

## 4. Teacher

### *R.4.1: Manage Content*

#### *R.4.1.1: Add videos related to course*

**Description:** Teacher can add videos

**Input:** name, description, course and video file to be uploaded

**Output:** Message is shown.

#### *R.4.1.2: Remove videos*

**Description:** Teacher can remove videos

**Input:** user click on video to be deleted

**Output:** Message is shown.

#### *R.4.1.3: Add Textbooks*

**Description:** Teacher can add textbooks

**Input:** name, description, course and pdf to be uploaded

**Output:** Message is shown.

#### *R.4.1.4: Remove Textbooks*

**Description:** Teacher can remove textbooks

**Input:** user click on textbooks to be deleted

**Output:** Message is shown.

## *Managing categories*

## Managing Videos

The screenshot shows the 'ShareEdu' web application running on a browser at localhost:4200. The page is titled 'ShareEdu' and has a 'Kashap' user profile. The main form for adding a video includes fields for 'Display Name For File', 'Description', 'Select Course', and 'Upload File'. The 'Upload File' section shows a 'Choose File' button and 'No file chosen'. Below the form is a 'Submit' button. Underneath the form is a section titled 'Video' containing a table with one row of data. The table has columns: #, Name, Path, Description, Category, and DEL. The row shows a video named 'kashap' with a path to a local file and a description 'this is a test of videos uploading'. A 'Delete' button is next to the video entry. The footer of the page reads '©SharedED, Inc. 2019'.

#	Name	Path	Description	Category	DEL
0	kashap	../assets/Video/Dolittle - Official Trailer.mp4	this is a test of videos uploading	Data-Analysis	Delete

## Managing Textbooks

The screenshot shows the 'ShareEdu' web application running on a browser at localhost:4200. The page is titled 'ShareEdu' and has a 'Kashap' user profile. The main form for adding a textbook includes fields for 'Name of the Book', 'Author's Name', 'Description', 'Select Course', and 'Upload File'. The 'Upload File' section shows a 'Choose File' button and the filename 'François Chollet - Deep Learning with Python (2018, Manning).pdf'. Below the form is a 'Submit' button. Underneath the form is a section titled 'TEXTBOOKS' containing a table with one row of data. The table has columns: #, Name, Course, Description, Author, Path, and Delete. The row shows a textbook named 'machine learning' with a course of 'Machine Learning' and a description 'a beginners guide for machine learning'. A 'Delete' button is next to the textbook entry. The footer of the page reads '©SharedED, Inc. 2019'.

#	Name	Course	Description	Author	Path	Delete
0	machine learning	Machine Learning	a beginners guide for machine learning	François Chollet	../assets/Textbook/François Chollet - Deep Learning with Python (2018, Manning).pdf	Delete

# Mailing

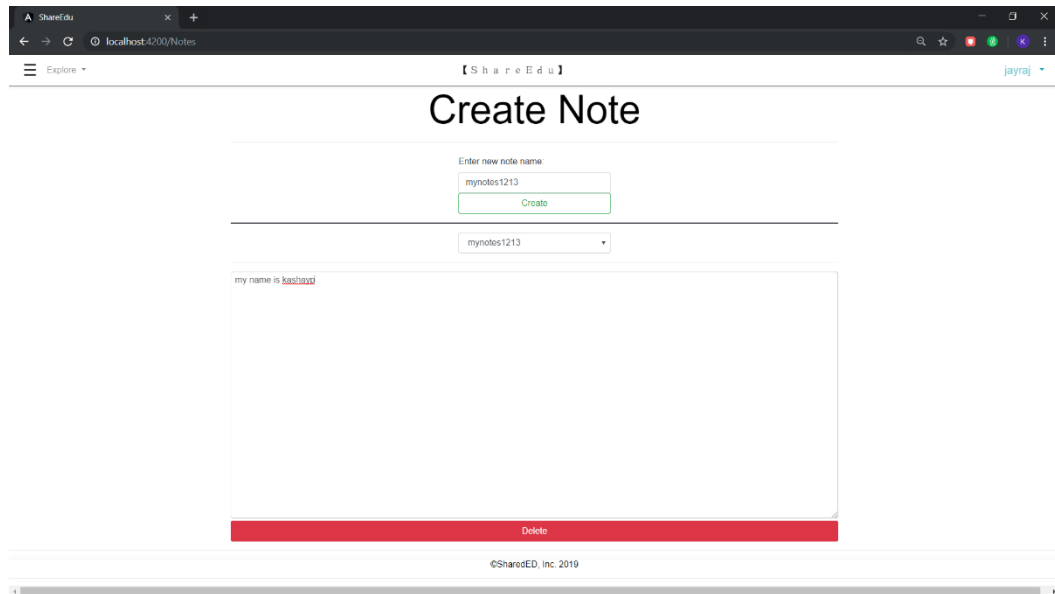

The screenshot shows a web browser window with the URL `localhost:4200/SendEmail`. The page header includes a hamburger menu, the text "Explore", the logo "【ShareEdu】", and a user profile "Kashap". The main heading is "Send Email" with a subtitle "-To every user of a particular course". The form consists of a "Select Course" dropdown menu, a "Subject" input field with the placeholder "Enter Subject", and a "Content" text area with the placeholder "This is an awesome text box". A blue "Send" button is at the bottom of the form. The footer contains the copyright notice "©SharedED, Inc. 2019" and three links: "Help", "Contact Us", and "Terms & Condition".

# Subscription

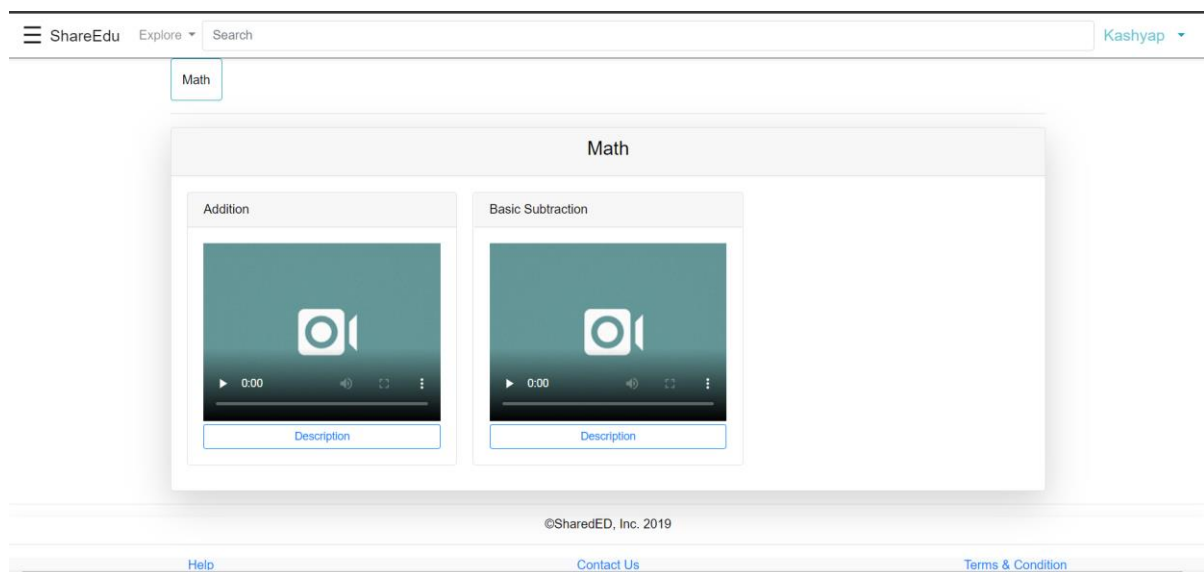

The screenshot shows a web browser window with the URL `localhost:4200/SubscribeCategory`. The page header includes a hamburger menu, the text "Explore", the logo "【ShareEdu】", and a user profile "jayraj". The page is divided into two main sections: "Availed Subscription" and "Available Subscription". Under "Available Subscription", there are four cards for different categories: "maths", "Science", "Data-Analysis", and "Machine Learning". Each card has a green "Subscribe" button. The footer contains the copyright notice "©SharedED, Inc. 2019" and three links: "Help", "Contact Us", and "Terms & Condition".

## Notes

## Displaying Videos

*\*Videos are displayed according to selected Category*

# *Implementation*

---

ShareEdu is divided into five main modules:

- User  
Its function to update/insert user details into database.
- Video  
Its function is to display all video according to selected category and upload videos.
- Textbook  
Its function is to a particular textbook which is selected by user on the basis of course, name and upload textbooks (only pdf) to database.
- Notes  
Its function is allowed user to take notes after they finished a video or course and save it to database.
- Email
  - It will mainly used to send important message to users of particular course for update related to that course.
  - Automatic updates are sent by system to users if anything new is available to a course.

## *Major Functionality*

---

### Course Selection:

Given a list available course, user selects an appropriate course.

### Assign Admin:

Main admin can assign to anyone else and so can they.

### Categories:

Based on user type a user can subscribe to a category from given list and can create category if user id admin.

### Videos:

Based on user type a user can view video based on subscribed category and can also upload/delete video if user is admin.

### Books:

Based on user type a user can view textbook and upload textbook and also delete textbook if they are admin

## *Further Extensions*

---

- ShareEdu can be further extended to admin, teacher, freelancer and student types of user.
- It can have quizzes, scoreboard for quizzes where student can compete with each other in a friendly manner to enhance their knowledge.
- Course can be made paid.
- It can be further extended on basis of category, standard and level.
- It means a category may have variety of course and user (Student) could enroll for a particular course.
- They can have their track record.
- A statistical report which help they them to keep track of milestone.
- A recommendation system can be employed for user for course system which ultimately help them to select right course.
- A feedback system must be employed to help user navigate through website or any other difficulty.
